

NABONSI NIGUSE

Backend-Focused Full-Stack Developer

Bale Robe, Ethiopia | nabonsin@gmail.com | [LinkedIn](#) | [GitHub](#) | [View My Portfolio](#)

PROFESSIONAL SUMMARY

Highly motivated Software Engineer and Computer Science Student with a deep specialization in backend engineering using Python, Django, and Django REST Framework (DRF). Proven expertise in architecting complex business logic, developing robust REST APIs, and writing highly optimized database queries with SQL and PostgreSQL. Demonstrates exceptional problem-solving skills with a strong track record of resolving system bottlenecks, managing clean data serialization layers, and seamlessly aligning backend architectures with React.js frontends. Adept at handling database migrations safely and efficiently configuring enterprise-grade systems. **Actively seeking a software engineering internship opportunity to leverage these technical capabilities in a professional environment while driving team success.**

TECHNICAL SKILLS

- **Backend Core & Frameworks:** Python, Django, Django REST Framework (DRF), RESTful API Design, MVC/MVT Architecture
- **Database & Query Optimization:** PostgreSQL, SQLite, Advanced SQL, Database Schema Design, Query Performance Tuning
- **Frontend Integration:** JavaScript, TypeScript, React.js (1 year)
- **Tools & Methodologies:** Git, GitHub, Postman, Contract-Driven Development, Singleton Design Pattern
- **Soft Skills:** Advanced Problem-Solving, Critical Thinking, Technical Communication

KEY PROJECTS

Premium Developer Portfolio | *Full-Stack Monorepo*

Technologies: React.js, TypeScript, Tailwind CSS, Django, Django REST Framework, PostgreSQL

- Built a highly optimized personal portfolio implementing a clean Monorepo structure for seamless frontend-backend alignment.
- Engineered custom DRF serializers and views with built-in Singleton protection in Django Admin to prevent duplicate record errors.
- Designed a premium UI leveraging glassmorphism, precise responsive containers, and smooth accent micro-animations.

Advanced E-Learning Platform

Technologies: Django REST Framework, React.js, PostgreSQL

- Developed a scalable backend architecture supporting course creation, student enrollment, and progress tracking modules.
- Designed optimized API endpoints with proper pagination and relational data structures ensuring sub-second response times.

E-Commerce System

Technologies: Django REST Framework, React.js, SQLite/PostgreSQL

- Implemented secure user authentication, shopping cart state management, and product catalog filtering systems.
- Created robust data serialization layers to ensure flawless data contracts between the Python API and React.js frontend.

Task Management (To-Do List) App

Technologies: Django REST Framework, React.js

- Built a sleek CRUD application featuring instantaneous UI updates and efficient client-side state management.

EDUCATION

B.Sc. in Computer Science Student

Ethiopia

CERTIFICATIONS

- Udacity Certified Developer — Specialized in Advanced Software Engineering practices.
- STEM Power Certification — Advanced training in technical innovation and practical engineering.
- Wabiskill Certification — Mastery in full-stack web architectures and professional project delivery.
